I'm a weather instrument enthusiast. I'm particularly interested in analog instruments, though I do have a few digital instruments. I generally don't buy expensive instruments, I look for instruments that operate well rather than for mahogany and brass. Visit the blog below for the latest changes to this website.

Analog Weather - Analog Weather Home Page

A barometer measures air pressure and can forecast the weather within a 12 to 24 hour period. Air pressure can be measured in inches of mercury, millimeters of mercury, or hectopascals, depending on where you live and the gauge on the instrument.
