Auto To Manual Transmission Swap

Automatic and manual transmissions both require a coupling device, a piece of equipment that is used to connect and disconnect the transmission and the engine as needed. In a manual transmission, that piece is called a clutch, and in an automatic transmission, it's a torque converter. In order to swap your automatic transmission for a manual (or vice versa if that's your objective), you'll need to disconnect the current coupling material and install the new one.

Automatic to Manual Transmission Swap | CJ Pony Parts

Bring the shifter and stick the handle up through the floor and insert the bolts through the side of the shifter holding it to the transmission. Tighten the bolts with a ratchet and a socket. Bolt the linkage from the shifter to the shift levers on the transmission. Make sure the shift and the transmission shift levers are both in neutral.

Runs

The Miata chassis is universal, meaning there is no difference between the auto and manual cars. So this allowed the manual transmission to bolt up to the engine as well as the shifter turret to be perfectly aligned. To completely connect the drivetrain the Power Plant Frame, as well as the driveshaft from the manual car, was required.

Automatic to Manual Transmission Swap

It depends on what vehicle and what manual transmission. In general, on a rear wheel drive vehicle, swapping out the auto for a stock style manual isn't terrible. Stock manual transmission assemblies can run anywhere from \$1000 to \$2000 on common vehicles. Removal and replace usually takes between 5 and 8 hours.

How much would an automatic to manual transmission swap ...

Ground the manual identification pin at the ECU. If possible, reflash the ECU to manual map or swap ECU to a manual model. Leave the transmission computer plugged in, unless you swap to a manual ABS pump in which case you can remove the auto transmission computer. Purchase iWire's Auto to Manual Transmission Conversion Connector Package

Subaru Auto to Manual Transmission Conversion Basic Overview

You can either trade in your Miata for a manual Miata, cobble together all the pieces to convert your Miata to a manual transmission, or buy a manual Miata and swap all the pieces between them, then reselling the Miata you bought as an automatic.

How to Manual Swap ANY CAR! (Complete Guide) - YouTube

You then have to swap in a set of manual pedals. The clutch linkage has to be put in. There is a small bracket that needs to be welded to the frame or now there is a bolt on bracket. I prefer the welded one. Putting on a clutch instead of the auto flexplate is probably the easiest part of the whole swap. Your wiring will have to be modified.
