Master Scheduling/MRP setup - Tech Community

MDS is your Master Demand Schedule for your customer sales orders and forecasts if you use them. MPS is one planning technique that can be used for items with independent demand (like from so) or items that are business critical so you want manual control over the planning process. MRP is another planning technique for non critical items that generally has their demand coming from dependent sources like a parent job order.

Difference between MPS and MRP | Oracle Community

A Master Production Schedule is the virtually exact same thing as MRP (Material Requirements Planning), the calculations are exactly the same, but there is one distinction. MPS plans items that have "direct" demand, called independent demand. Independent Demand means that its demand comes from Sales Orders, Service Orders, or forecasts.

The Difference Between MRP and MPS | ArcherPoint

The main difference is that production planning works with MRP planned orders & MPS firm planned o - Production Planning Production Planning and Master Scheduling are sometimes combined depending ...
