concepts in studying chemical solutions are solution concentration and solubility equilibrium.

Chemical Solutions (with worksheets, videos, activities)

In chemical thermodynamics, activity (symbol a) is a measure of the "effective concentration" of a species in a mixture, in the sense that the species' chemical potential depends on the activity of a real solution in the same way that it would depend on concentration for an ideal solution.

Thermodynamic activity - Wikipedia

SESAR Solutions Catalogue SESAR Solutions refer to new or improved operational procedures or technologies that aim to contribute to the modernisation of the European and global ATM system. Each solution includes a range of documentation, including: Operational services and environment descriptions;

SESAR Joint Undertaking | Solutions

Well, mixtures retain their original properties, and solutions do not. In most cases, a solution has different properties than the two or more parts that went into making it. Also, solutions are the combination of a solute and a solvent. For example, in salt water, the salt is a solute and water is the solvent.

Messin' with Mixtures - Activity - TeachEngineering

Activities in solutions An activity represents a specific operation that is performed as part of a case. An activity can consist of one or more steps that must be completed to complete the activity. Alternatively, an activity can be a simple checklist item that is not associated with a workflow.
