The Sun and the Shadow: My Experiment With Lucid Dreaming ...

The Sun's position in the sky affects the length of the shadow. When the Sun is low on the horizon, the shadows are long. When the Sun is high in the sky, the shadows are much shorter. We can create the same effects indoors by changing the position of a torch as it shines on an object. Although the shadow effects are the same, the reasons for the moving light source are very different.

Background. Sun in Shadow was the capital of the Engwithan civilization and its greatest city. Located beneath what is known to the kith as Twin Elms, it was a jewel of architecture and its greatest city. However, the creation of the gods destroyed it, taking the souls of thousands of men, women, and children, striking them down where they stood and feeding into the great machine erected at the heart of the city.
